## S1D13517 SVGA External SDRAM LCD Controller

The S1D13517 is a SVGA color LCD graphics controller which uses an external SDRAM display buffer. The S1D13517 supports an 8/16-bit indirect host interface while providing high performance bandwidth to external SDRAM, allowing for fast screen updates.

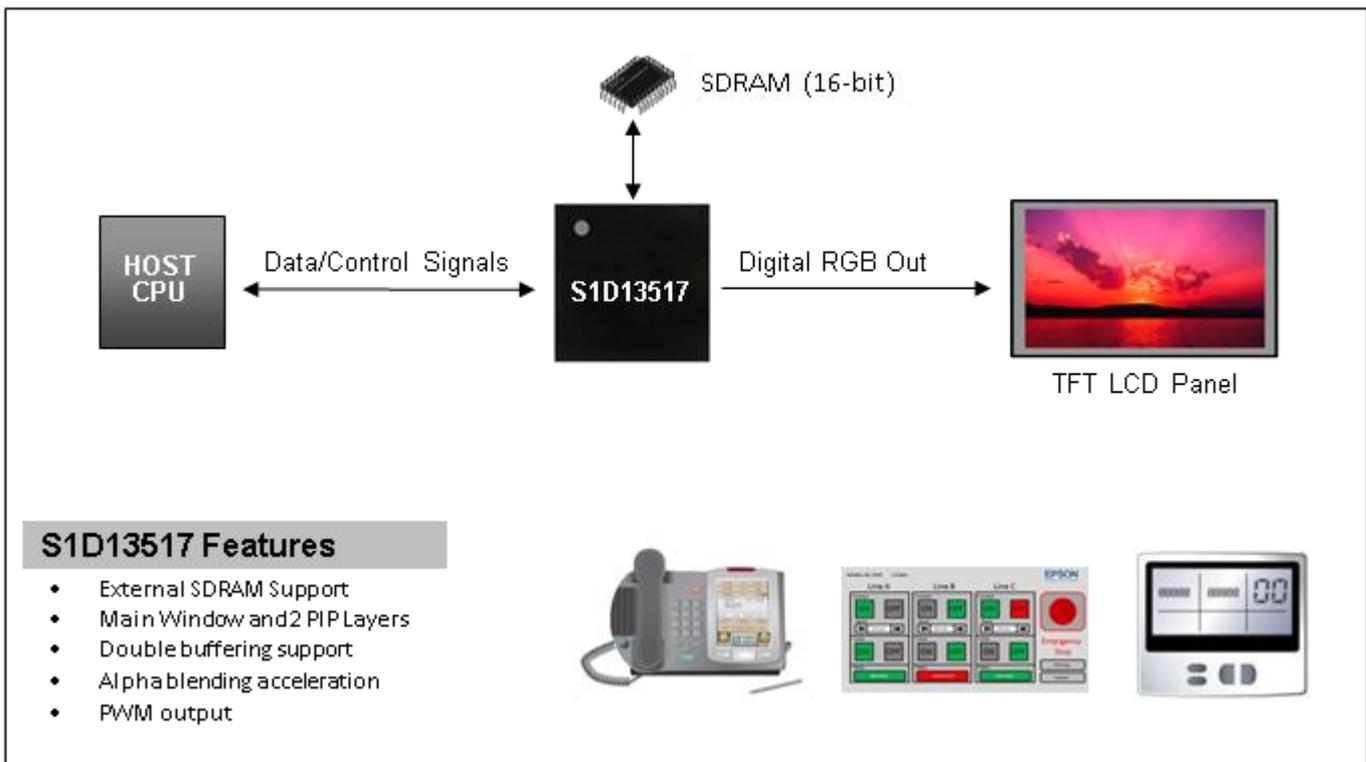

The S1D13517 supports displays up to 960x540 (QHD) @ 24 bpp or 800x600 (SVGA)@24bpp, controlling a main window and up to two picture-in-picture windows. Additionally, the S1D13517 incorporates a 2D graphics engine with alpha blending capability. It uses a double-buffer architecture to prevent any visual tearing during streaming video screen updates.

Targeted for SVGA designs, the S1D13517 combines a rich feature set with impartiality to CPU type or operating system which makes it an ideal solution for a wide variety of applications.
